

Metal fabrication, assembly, and prototyping — made in Detroit.

Beacon Manufacturing is a Detroit-based contract manufacturer pairing decades of skilled-trade craftsmanship with modern digital fabrication. From one-off prototypes to recurring production runs, we cut, form, weld, finish, assemble, kit, and ship — all under one roof. Short lead times, tight tolerances, and a single point of accountability for engineers, founders, and procurement teams.

CORE CAPABILITIES

Fabrication

Precision sheet-metal and structural metalwork from raw stock to finished part.

- Fiber laser cutting (up to 1/2")
- CNC press brake forming
- MIG / TIG / spot welding
- Powder coat & wet paint
- Grinding, deburring, polishing

Assembly

Sub-assembly and finished-goods build with mechanical, electrical, and pneumatic integration.

- Mechanical & fastener assembly
- Electrical harness & panel build
- Pneumatic / hydraulic integration
- Functional test & QA
- Kitting & final packaging

Prototyping & DigiFab

Rapid iteration with digital fabrication for fast turns on form, fit, and function.

- 3D printing (FDM, SLA, SLS)
- CNC routing & milling
- Laser engraving & cutting
- DFM review & design support
- Low-volume pilot runs

WAREHOUSING & LOGISTICS

One roof, end to end.

42,000 sq ft Detroit facility

On-site warehousing, inventory programs, and outbound logistics keep your supply chain tight. We hold stock, manage Kanban replenishment, and ship direct to your line, your customer, or your DC.
